Note : SP = Standard Pack Quantity, g = Weight in Grams, F-T = Fusion Time in Seconds, C-T = Cooling Time in Minutes

Kimplas Electrofusion Elbows, manufactured in PE80 (Blue) grade are Standard SDR 11 (PN 12.5) rated. For exact recommendations on compatibility for welding with SDR 9 through SDR 21 or PN 6 through PN 12.5 pipes, refer Kimplas Technical Specifications Manual.

Standards:

- PE Pipe Compatibility : ISO:4427 - Part 2, EN:12201- Part 2, IS:4984, DIN : 8074
- Complies with ISO : 4427 - Part 3 & EN : 12201 - Part 3

Common Applications:

- ✓ Make a 90° turn on mains and distribution pipes in a distribution network
- ✓ Turning pipe through 90° in narrow trenches, in areas difficult to access and House Service Connections
- ✓ Pipe Connections with spigot end fittings, pipe stub ends etc

Installation :

Joint preparation must be done as specified in the installation instructions. Pipe outside surface must be scraped to remove oxidized layer. Before fusing, pipe ends and inside of the fittings must be cleaned to remove dirt and contamination. Complete Installation Manual may be downloaded.

Advantages :

- Standard Operating Voltage - 40 V
- Same fusion time for various PN rated pipes
- Higher penetration of pipe in the fittings enables proper alignment
- Optimal fusion and cold zone for a strong and sturdy joint
- Auto Temperature compensation for ambient conditions -5°C to +40°C
- Clearance-Fit for ease of installation
- Pop-Up fusion indicators to indicate fusion process performance
- Permanent Batch Indicator, Fusion Time, Cooling Time, Raw Material Grade and SDR marking
- Each fitting individually packed in PE bag to protect against contamination and oxidation
- Each fitting with water-proof bar code to automatically feed fusion data to the Control-box for fusion process
