Kimplas Meter Box/Valve Box-8"x12" is always recommended to encompass & protect Water meters/Valves installed on Drinking Water Supply pipes of size range from 1/2" to 1".

Kimplas Meter Box/Valve Box consists of main body and closing lid, It is available in two options, one with provision for an external lock and the other with an inbuilt lock as per customer requirement. The Body has rectangular shape with reinforcement ribs for making it sturdier. For meter reading, the service lid can be taken out after opening of lock. The body has windows through which the inlet and outlet pipes pass through.

Kimplas Meter Box in its properly buried installed position, is designed to take load of human traffic and small vehicular load that usually appear in residential areas up to 150kg.

Base of the body has skirting with holes for nailing which firmly secure the box on ground.

Note: Every effort has been made to ensure the information in this brochure is correct at the date of issue. Kimplas operates a policy of continual product improvement and range extension, hence reserves the right to modify product specifications, without prior information, in line with market requirements.
