

Ratchet type - Snap Cutters For Pipe Sizes 20 to 32 MM and 20 to 63 MM PE pipes

Overview :

- These type of cutters are required to cut the pipe at the correct pressure ensuring little buckling & also to ensure no irregularities in the Cut section of the pipe
- The cutter size & shape will get decided depending up on its use. If it is a confined space, these are most ideal compared to Rotary or Guillotine cutters
- These are very easy to handle & hence are very widely used
- With every step of the ratchet, the blades come nearer till the stage is reached, when the pipe is cut in 2 pieces
- Ratchet cutters are designed to cut pipes from 20 to 63 mm diameter

Specifications :

- Blades are special for Plastic & Metal hence it is necessary to specify the type of pipe material
- The Sizes of cutters & weight is as follows
Dia. 20 to 32 mm - 20 cm X 14 cm X 3 cm - Weight - 0.4 Kg
Dia. 20 to 63 - 28 cm X 10 cm X 3 cm - Weight - 0.9 Kg

Features :

- The guided path for the blade ensures cutting the pipe perpendicular to the pipe axis
- Cutting in steps of the ratchet reduces efforts
- Cutter blades can be pulled away by pulling the 2 levers away from each other
- High carbon steel cutter blades are used giving smooth cut & long life
- Sleek shape for good grip in hands
